

Environmental Protection Policy Statement

CWF is committed to being an environmentally responsible construction industry company.

The company will:

- operate an Environmental Management System (EMS) which complies with the ISO 14000 international standards and will continually improve the effectiveness of the EMS;
- prevent pollution;
- identify opportunities for waste reduction and conservation of energy and materials;
- assess the environmental aspects and impacts of the business activities, products, and services, and will manage the significant aspects to minimize their impact;
- comply with environmental legislation, regulations, and other subscribed requirements which relate to the environmental aspects;
- promote awareness and respect for the environment among staff and stakeholders including clients, residents, suppliers and contractors; and
- establish objectives, target and programs in order to measure and continually improve environmental performance.

This policy and our environmental performance is communicated to all stakeholders, interested persons and the public. The policy will be reviewed regularly for continuing suitability and effectiveness.

Phillip T. M. Wong
Managing Director
